

A film coating
that supports
your clean label
strategy?
Why not!

Natural ready-to-use film coating formulation for dietary supplements (such as extracts, vitamins or minerals). Certified organic.

Product Information NutraPolish® Organic

The ready-to-use film coating powder compound provides an immediate release profile for dietary supplement tablets. Due to the mix of selected natural and organic certified ingredients it is well suited for solid dosage forms, where a clear and aesthetic look is intended. The formulas are developed to replace undesired substances from the list of ingredients, for a consumer-friendly labeling.

For an improvement in appearance and finish of dietary supplements, this clear film coating gives more brilliance on uncoated tablets. After applying the clear **NutraPolish® Organic** the tablet surface receives a glossy look and facilitates a better swallowability. Also coated tablets improve the packaging process because of better slip and reduced dust formation. In addition to these properties, the tablet core receives a better barrier against moisture, which is highly beneficial for extracts and other nutritional supplements.

The simple and fast aqueous preparation of the ready-to-use powder compound enables an easy application of the suspension.

Formulation:

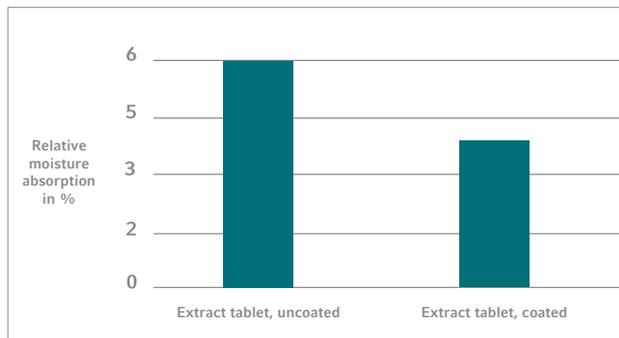

Only selected high quality and approved natural ingredients are considered in this formula. For a label-friendly ingredient list it is vegan, Non-GMO, Non-Allergen and **free of:** maltodextrin, palm oil, silica and synthetic polymers.

DE-OKO-039

EU- & US-label certified for organic food.

Moisture barrier test (duration 1 week). The extract tablet core was coated with NutraPolish® Organic (5% weight gain) and absorbed less water than the uncoated extract core.

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been the specialist for the homogeneous mixing of excipients and carriers. With locations in Germany, Switzerland, America and Russia, we support the food supplement and pharmaceutical industry in the development, formulation and production of solid oral dosage forms. The tailor-made and ready-to-use special powder mixtures for film coating, sugar-coating, coloring and tableting enable optimum results in a short time. Easy, fast and reliable!
